The Consultant's Value Ladder

2. Downloadable Worksheets & Further Reading Hub

A. Worksheet: "The Consultant's Value Ladder"

- **Purpose:** A fill-in-the-blanks tool to help learners map out how they can grow a single ₦15,000 job into a ₦45,000 project.

Step 1 (Basic Job): Designing one company logo for ₦15,000.

Step 2 (The Value-Add): Suggesting an animated version of that logo for video content.

Step 3 (The Growth Project): Turning the logo into a full "Brand Identity Kit" including social media banners and business card designs for a total of ₦45,000.

Growing a N15,000 job to a N45,000 Gig is easy, but then before you can do that, you need to think like a problem solver with an eye of spotting other related areas of improvement from your client's business. After identification fo those areas, you then professionally list those areas and suggest possible ways to correct them using your services which will make the client see you as someone who they can work with long-term because you understand what their business needs, and you help them see what they need.

B. Further Reading Hub (PDF Links/Copy):

- **"The Early Truth Manual":** A guide on how to communicate delays professionally without losing client trust.
- **"Nigeria's Fintech for Freelancers":** A simplified guide on using apps like PiggyVest or Kuda to automate the "3-Jar" savings system.
